Senior Mobile Engineer with 5+ years of experience building scalable Android and iOS applications using Flutter, Kotlin, and ReactNative. Experienced in Clean Architecture, performance optimization, and end-to-end mobile application development. Proven track record delivering production applications used by 1,000+ users, reducing bug rates by 40%, and translating business requirements into maintainable and scalable mobile solutions.

EXPERIENCES

Mobile Engineer (Freelance) | PT Maxon Prime Technology (Apr 2025 – Dec 2025)

- Designed and developed a mobile application from scratch using Flutter, owning the full development lifecycle from architecture to production deployment.
- Implemented complex filtering and engineering calculation logic to improve pump selection accuracy.
- Delivered a production-ready engineering application improving pump selection accuracy for industrial clients.

Full-Stack Mobile Engineer | PT Fusi Solusi Transformasi (Mar 2024 – Dec 2024)

- Designed and implemented internal enterprise applications used by 200+ employees for invoice tracking and workflow automation.
- Architected scalable system structure using Clean Architecture principles.
- Collaborated with cross-functional teams to align technical delivery with business objectives.

Mobile Engineer | Badan Wakaf Al-Quran (Jul 2020 – Sep 2023)

- Developed and deployed donation campaign mobile app serving 10,000+ users.
- Reduced bug rate by 40% through architecture refactoring and structured debugging.
- Led and mentored a team of 3 mobile engineers, defining coding standards and architectural direction.
- Revamped attendance system for 300+ employees, improving internal operational efficiency.

Android Developer | PT Amanah Karya Indonesia (Jan 2020 – Jun 2020)

- Introduced workflow improvements increasing employee efficiency by 20%.
- Refactored 10,000+ lines of legacy codebase, increasing maintainability by 25%.
- Released Play Store application achieving 1,000+ downloads.

PROJECTS

EzzHalal | *January 2024 – December 2024*

An online marketplace that specifically sells halal products and sellers who have verified halal certificates.

- Improved mobile performance by 30% and optimized backend API response by 20%
- Integrated Stripe API supporting international payments across 5+ countries.

Hallaw – Legal Solution | *July 2023 – March 2024*

An online legal aid application that is ready to assist you in getting quick and easy access to the legal services you need.

- Built remote legal consultation application with integrated voice and video communication using Agora SDK.
- Increased user accessibility and engagement by 30%.

Alita WMS | *July 2022 – December 2022*

An Alita.id warehouse application to make it easier for employees to track incoming and outgoing goods.

- Digitized warehouse operations for 100+ employees.
- Reduced paper usage by 90% through digital workflow implementation.

SKILLS

Mobile Development: Flutter, Kotlin, Swift, Android SDK

Architecture: Clean Architecture, MVVM, Modular Architecture

State Management: Riverpod, Bloc, GetX, Provider

Backend & Integration: REST APIs, Stripe API, Firebase, Agora SDK

Tools & Workflow: Git, CI/CD, Android Studio, VS Code, Xcode, Agile/Scrum
